Professional Summary

Computer Science undergraduate with strong knowledge of Data Structures & Algorithms. Actively involved in academic and practical projects, with an interest in solving real-world problems using technology. A quick learner and team player, aiming to grow as a Software Engineer through hands-on experience.

Education

JK Lakshmipat University (NAAC A) — Jaipur, Rajasthan
Bachelor of Technology in Computer Science (B.Tech CSE) — Aug 2024 – Present
- **Coursework:** DSA, DBMS (SQL)

Children's Academy Sr Sec School — Alwar, Rajasthan
Senior Secondary (Class XII) – Science with Mathematics — 2022 – 2023

Technical Skills

Languages: C, C++
DSA
Web: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB
Databases: SQL
Tools: GitHub, Git

Projects

Diabetes Risk Prediction System
Python · Scikit-learn · XGBoost · Pandas

- Developed a machine learning system to predict diabetes risk using the Kaggle PIMA Indians Diabetes dataset.
- Trained and evaluated 4 models — Logistic Regression, Decision Tree, Random Forest, and XGBoost— with comprehensive performance comparison.
- Best result: Random Forest achieved 93.00% accuracy; Logistic Regression achieved the highest ROC-AUC of 0.9402.
- Integrated model evaluation metrics including Accuracy, F1-Score, and ROC-AUC for rigorous benchmarking.

QuickFix+
HTML, CSS, JavaScript

- Web application for technical and maintenance services
- Simple UI with service request handling
- Practical exposure to web technologies
- Connecting consumers with gig workers

Participation

- Participated in LNMIIT Hacks 8.0 — Jan 2026
- Participated in Hack JKLU v4.0 — March 2025
